Projects

HOTEL BOOKING WEBSITE
HTML,CSS,Javascript,Node.js,react.js
🔗 **Project Link**
Created a website that facilitates the end user to view the hotel and hotel rooms based on the various categories and sorting preferences they select.It also lets the users register to the website so that individual profile can be maintained.

LIBRARY MANAGEMENT SYSTEM
C++,OOPs,MySQL
🔗 **Project Link**
Created a C++ based Library Management software illustrating OOPs concepts to issue books which maintains the database.This system is useful for both students and library manager to keep a constant track of all the books available in the library and allows both the admin and the student to search for the desired book.

MY PORTFOLIO
